## Introduction

Electronic Health Information (EHI) export will enable a clinician to export all EHI of a single patient or population of patients or all their patients stored in the GlaceEMR.

EHI means “electronic protected health information” (ePHI) as defined in 45 CFR 160.103 to the extent that it would be included in a designated record set as defined in 45 CFR 164.501, regardless of whether the group of records are used or maintained by or for the practice.

## Single Patient Export

Enable a user to timely create an export file with all the EHI of a single patient that are stored in GlaceEMR. Single Patient EHI Export includes the capability for an authorized user to execute a single patient export and download the zip file contain all the EHI of this exported patient.

## Patient Population Export

Enable a user to timely create an export file with all the EHI belong to a selected group of patients or entire patient population that are stored in GlaceEMR. Patient Population EHI Export includes the capability for an authorized user to either to specify a criteria to select a population of patients or all the patients in the database to export and download the zip file contain all the EHI of this exported patients.

## Contents of the Exported Data

Once the export is completed a link to a zip file will be presented. The zip file will contain the following top level folders.

## Documents Folder Content

Which contains patient related documents in HTML, PDF and XML format.

The main Document folder contains one sub-folder for each patient named in the following format

**LastName,FirstName-(DOB MM-DD-YYYY)-(Account#)-[PatientID]**

Ex: SMITH,JOHN-(03-15-1983)-(1234F2)-[412]

This sub-folder contains.

1. Clinical Templates Files: Exported as HTML and PDF formats. HTML files are kept under HTML folder and PDF files are kept under PDF folder.

These are indexed in **EMR/Clinical\_Document\_Index\_File.csv**

The Files are named as follows:

**HTML/LastName,FirstName-(DOB MM-DD-YYYY)-(Account#)-[PatientID]-[NoteID]-Notes Document Name.html**

Ex: HTML/SMITH, JOHN-(03-15-1983)-(1234F2)-[412]-[43422]-Progress Notes.html

**PDF/LastName,FirstName-(DOB MM-DD-YYYY)-(Account#)-[PatientID]-[NoteID]-Notes Document Name.pdf**

Ex: PDF/SMITH, JOHN-(03-15-1983)-(1234F2)-[412]-[43422]-Progress Notes.pdf

2. Scanned Documents and Attached Documents: Scanned Documents are exported in PNG or JPEG format in which they are stored in the GlaceEMR. Attached Documents are exported in the format they are originally attached to GlaceEMR.

These are indexed in **EMR/Scan\_And\_Attachments\_Index\_File.csv**

The Files are named as follows:

**LastName,FirstName-(DOB MM-DD-YYYY)-(Account#)-[PatientID]-[DocumentID]-[Created Date MM-DD-YYYY]-DocumentCategory.jpg**

Ex: SMITH,JOHN-(03-15-1983)-(1234F2)-[412]-[139418]-[10-06-2023]-Adv-Directive Mental Health Treatment.jpg

3. C-CDA Files: At the time of this documentation GlaceEMR generates C-CDA v2. These files are stored as XML file format.

These are indexed in **EMR/CDA\_Document\_Index\_File.csv**

The Files are named as follows:

**LastName,FirstName-(DOB MM-DD-YYYY)-(Account#)[PatientID].xml**

Ex: SMITH,JOHN-(03-15-1983)-(1234F2)-[412].xml

### **Photos Folder Content**

Photos are stored in JPG format. The main Photos folder contains one file for each patient named in the following format

**LastName,FirstName-(DOB MM-DD-YYYY)-(Account#)-[PatientID].jpg**

Ex: SMITH,JOHN-(03-15-1983)-(1234F2)-[412].jpg

### **Reference Folder Content**

Contains the schema of the Exported file content.
